

drill shank rod with hexagonal 22×108 mm and R25 thread

This shank rod features light weight, high strength, corrosion resistance, and excellent wear resistance, making it ideal for use in mining, geology, and other fields.

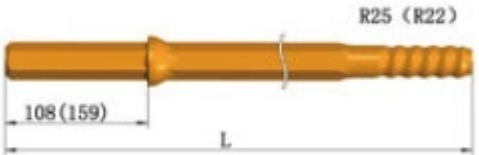

The drill shank rod features a simple structure and is easy to operate, which can save labor costs and reduce the risk of accidents.

Technical Specifications

- **drill shank rod length options:** 420 mm, 500 mm, 800 mm, 1 m, 1.2 m, and 2 m.
- **shank specifications:** hex 22 x 108 mm and hex 22 x 159 mm are available.
- **Connection thread options:** R25 and R22.
- **Weight:** ranges from 1.3 kg to 6.2 kg, with specific details found in the table.

drill shank rod with hexagonal 22x108 mm and R25 thread
