

R38 underground mining jumbo drill tools

This R38 threaded series of drill bits includes both cross-type and X-type designs. The cross bit is easier to sharpen because the included angles on all four sides are equal. The X-type bit is suitable for rock formations that are very prone to wear and cracking.

Technical Specifications of R38 Threaded Cross Bit

- **Connection thread:** R38
- **Head material:** Embedded tungsten carbide teeth
- **Bit body material:** High-strength alloy steel
- **Flushing grooves:** Distributed along the bit for discharging cuttings and waste fluid, and for cooling medium.
- **Head design:** Available in cross and X shapes
- **HxT:** 16×10 mm
- **Diameter:** 64 mm
- **Weight:** 1.63 kg

Thread bit, Insert	D (mm)	D (inch)	Insert H x T	Thread	Order number	Weight (kg)
Cross 	64	2 1/2	16 x 10 mm	R38	B158-6416-5610	1.63
X bit 	64	2 1/2	16 x 10 mm	R38	B168-6416-5610	1.63
