

The internally threaded rock drill shank adapter is suitable for situations where drilling space is limited and overall feed length is critical, such as underground roof bolting.

### Function of the Rock Drill Shank Adapter

The function of the rock drill shank adapter is to transmit rotational torque, feed force, impact energy, and flushing medium to the drill string, such as extension rods and drifting rods.

### Compatible Shank Adapter Models for Secoma Rock Drills

Users can choose different models of shank adapters, which are suitable for various models of Secoma rock drills, as shown below:

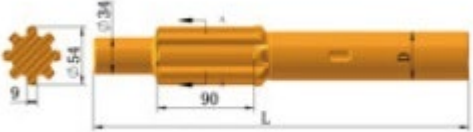

- Secoma 200, 300
- Secoma 200

### Technical Information for Rock Drill Shank Adapters

- **Length:** 485 mm, 351 mm, etc.
- **Diameter:** 38 mm and 45 mm.
- **Connection thread specifications:** R32 and R38.
- **Weight:** 3.7 kg to 4.2 kg.

rock drill shank adapter compatible with secoma machine

Shank adapter	L mm	D mm	Thread	Order number	Weight kg
Secoma 200, 300 	485	38	R32	B448-3848-5154	3.9
	485	38	R38	B448-3848-5156	4.2
	485	38	T38	B448-3848-5176	4.1
Secoma 200 	351	45	R32	B448-4535-5054	3.7
